

Cartoning Machine

Semi-Automatic Cartoning Machine

Machine is used for auto gluing the carton . Filled cartons has to load manually to the conveyor and side flaps of the carton will be glued automatically with the help of automatic gluing machine (Nordson make) .Side flaps will be closed automatically on the conveyor and sides will be pressed for intact sealing It is specially designed for small scale and medium scale industry .like Ready to Eat & Ready to Cook Industry, Spices Industry . It is designed for faster operation in less open space and with minimum labor. It increases the output efficiency with ease of operation and automization.

It Can seal and glue all kinds of packing Paper boxes. Production could be achieved as high as 20 to 25 boxes per minute. Operates on single phase 220V 50Hz supply.
