

Check Weighers

Check weighers are automatic machines to check the weight of packaged commodities. It is used at the off-going end of a production process and is used to ensure that the weight of a pack of the commodity is within specified limits. Any packs that are outside the tolerance are taken out of line automatically.

Features :

- DW01 Weighs a wide range of flexible and rigid packs up to 1kg
- Excellent accuracy, especially with flexible packaging
- Fast Belt speeds up to 40 m/min
- Reliable heavy duty conveyor components, high quality electronics
- Easy to use full colour graphical touch screen
- Environment wide operating temperature range 0-40°C

General Specifications :

Finish	304 stainless steel with mirror finish
Maximum Weight	1000 gm
Maximum Product Width	250 mm
Maximum Product Length	360 mm
Typical Accuracy	0.5 gm
Typical Reject Options	Air Blast, Pusher, Diverter Cover
Options	Servo feedback signal - for filler controls
Belt type	Food quality flat belt - quick release (no tools required)
Capacity	Up to 120 ppm
