

Sachet & Pouch Handling Systems

Modular Conveyor

These are the most useful conveyors for product movement such as pouches, bags, boxes or any kind of packed commodity in a factory.

Moving products through inclines, declines and production line curves, the sprocket driven thermoplastic belts ensure positive tracking while providing quiet, smooth, trouble-free performance.

General Specifications :

Frame Construction	SS 304 or Powder Coated Mild Steel
Standard Chain Width	6", 12", 18" and 24"
Wearstrips	$\frac{1}{8}$ " Thick UHMW in Straights
Motor/Reducer	MGM Varvel make
Speeds	Minimum 30 FPM Maximum 290 FPM
Supports	"H" Formed 2" x 2" Elevation Range 22"-50"
Chain Styles	Flat Top, Radius Flush Grid, LBP Roller, Flat Friction
