

Sachet & Pouch Handling Systems

Roller Conveyor

Mainly there are three types Roller conveyors

- 1. Powered Roller Conveyors** : are chain driven (Continuous chain drive or Roll-To-Roll chain drive). Modular construction in standard. Adjustable leg support eases installation and leveling at site. MOC can be MS or SS as desired.
- 2. Power & Free Roller Conveyors** : Rollers are weight sensitive (Which is adjustable) & they get disconnected from the chain drive for loads higher than set load. Roller – MS Chrome Plated or Galvanized, SS 304, SS316.
- 3. Gravity Roller Conveyors** : With Gravity material to be conveyed rolls down by gravity over roller bed.
