

## Material Conveying Systems

### Screw Conveyors

It is used to convey powders horizontally or in a particular inclination angle. it is most commonly used for feeding into packaging machine or processing machine hopper with level control or feed rate control.

#### General Specifications : (for Inclined Screw Feeders)

Hopper Capacity	115 ltr, 202 ltr, 270 ltr
Material Feeding Height	1000 mm (setable +- 100mm)
Material Dropping Height	up to 3000 mm
Output	40 to 200 ltr/min
Construction	MS powder coated or SS 304 (optional)
Contact Parts	SS 304
