

Sachet & Pouch Handling Systems

Take Up Conveyor

It is used to pick & transfer the ready pouches coming out of a packing machine to Rotary Table or Packing Table. It can also transfer pouches from one station to another.

Features :

- It is compact, sturdy and most efficient in working
- The superior quality textured and clitted belts are used to avoid slipping of packets
- It has the most simplistic design for high cleanability and easy maintenance
- It carries packets or strips as per packaging machine output speed with the help of VFD speed control
- It has a unique feature of adjustable inclination to adjust the drop height
- It has adjustable side guards to set as per pouch width
- Available in customized length, width and capacity as per requirement
